

#QUARRY

TOURISM INTERNSHIP **SUMMER: JUNE – AUGUST | ROANOKE, VA**

THE QUARRY

The Quarry at Eddy Alexander gives interns the tools to sculpt themselves into forward-thinking, problem-solving, agile practitioners in their fields. Our clients span a wide range of industries, including: emerging technology, economic development, higher education, healthcare, professional services, tourism, and more. The Quarry serves as a platform to provide a diverse, hands-on training opportunity for young professionals interested in graphic design, public relations, and marketing in these industries.

You are new to the field; we are experts in ours. The Quarry is a challenging program that will both push and support you on your professional journey. Eddy Alexander is an exciting place for the exchange, implementation, and measurement of ideas in a high growth business environment. Our interns work on real projects and offer valued opinions and expertise. At Eddy Alexander, every employee has a trusted voice, and every project is designed to provide incredible value to clients while creating growth opportunities for our team.

CHISELING: GOALS & EXPECTATIONS

Interns should be self-managed and driven, but not be afraid to ask for direction and feedback to fill knowledge gaps, with a mind towards translating their experiences into meaningful full-time career preparation. The Quarry's hands-on approach is designed to help bridge the gap between what is learned in the classroom and what is necessary in the professional world.

At Eddy Alexander, concepts and campaigns are created with research and methodology in mind. Interns will learn how to apply data about clients, their market and target audience, and achieve pre-defined goals by giving input in strategy meetings and working directly on real client deliverables.

Interns are expected to provide input on their scope of work to facilitate the most successful and valuable internship experience possible. Interns will be coached, mentored, and evaluated by their assigned summer sponsor and the Chief Strategist at Eddy Alexander and presented with a certificate of completion at the end of their term. In the past, exceptional candidates have also earned a certificate of achievement, letters of recommendation, and future job offers.

After their time in the Quarry, interns will have a deeper understanding of what goes into marketing, creative design, media planning, public relations campaign processes, and how to deliver meaningful, measurable client results.

SCULPTING: INTERN SPONSORSHIP

Through real-life and immersive experience, interns work with a designated point person who manages daily tasks and the overall internship experience, providing both guidance on how to excel technically and how to think about and document each new experience for maximum long-term career benefit.

Alongside their sponsor, interns will set goals for the program and continually track their progress to ensure that the internship is presenting skills and learning opportunities at an appropriate pace for measurable skill growth.

Interns will be tasked with specific projects and assignments during the day, but are encouraged to take advantage of available programs, subscriptions, certifications, and networking opportunities throughout the program's duration.

QUALIFICATIONS

- Creative problem-solving skills and a willingness to suggest new ideas
- Attention to detail and high-level quality standards
